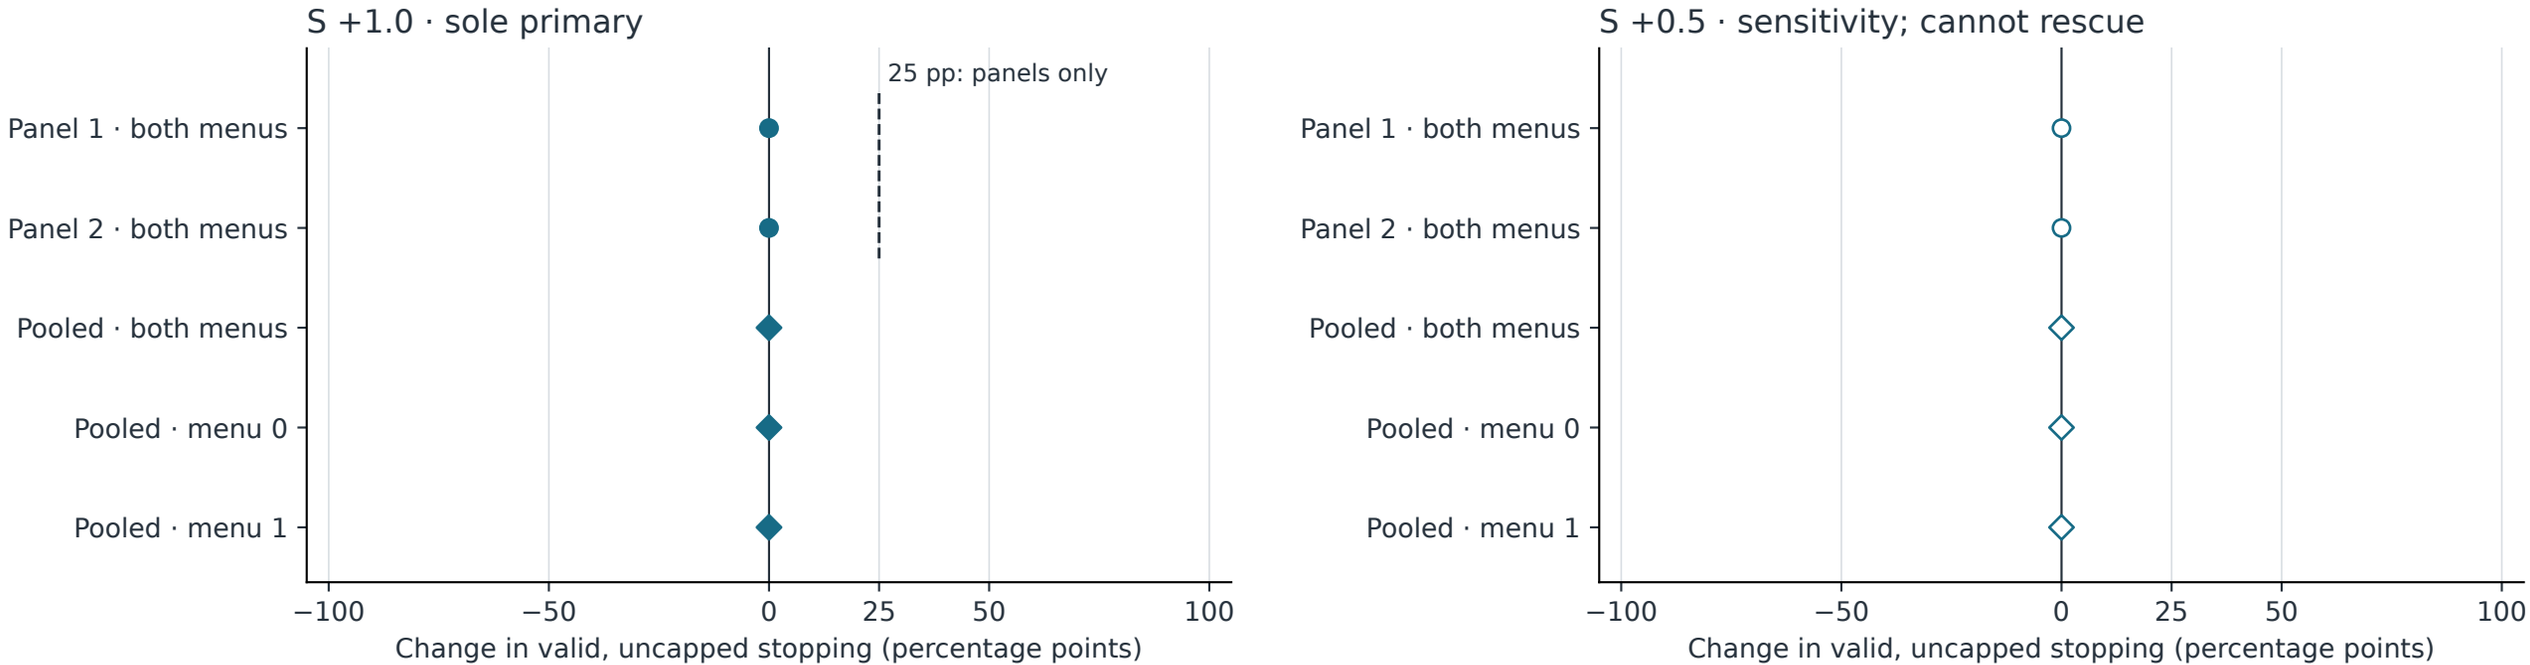
Stopping after redundant evidence: each dose versus zero sham



Decision: readiness failed. Task readiness: FAIL; audit readiness: FAIL.
Complete/integrity verified. Sham: PASS; engagement: PASS; receipts: PASS.

S +0.5/+1.0 multiply the frozen full corpus-A satisfaction contrast norm; these are not state or score units.
12 worlds per panel; pooled24 with equal panel weights. Worlds average both menus unless identified separately.
95% descriptive percentile intervals:10,000 whole-world draws within panels. Zero-width intervals reflect invariance among observed world contrasts, not population certainty. Only S+1 panel rows require25pp; pooled menu gates require >0.
Exploratory screen; intervals do not determine advancement. No specificity, natural-state or inner-experience claim.
